
The Semantic Web Iswc 2010 9th International Semantic Web Conference Iswc 2010 Shanghai China N

semantic web - wikipedia - the semantic web is an extension of the world wide web through standards by the world wide web consortium (w3c). the standards promote common data formats and exchange protocols on the web, most fundamentally the resource description framework (rdf). according to the w3c, "the semantic web provides a common framework that allows data to be shared and reused across application, enterprise, and ... **introduction to semantic web technologies & linked data** - semantic web technologies a set of technologies and frameworks that enable the web of data: resource description framework (rdf) a variety of data interchange formats (e.g. rdf/xml ,n3 ,turtle ,n-triples) notations such as rdf schema (rdfs) and the web ontology language (owl) all are intended to provide a formal **semantic web and the libraries: an overview** - their semantic web activity pagew3c states : "the idea of having data on the web defined and linked in such a way that it can be used by machines not just for display purposes, but for automation, integration and reuse of data across various applications. **introduction to the semantic web - world wide web ...** - 1 introduction to the semantic web (tutorial) 2009 semantic technology conference san jose, california, usa june 15, 2009 ivan herman, w3c ivan@w3 **a brief introduction to the semantic web - wikiworks** - "semantic web" means different things to different people. semantic information on the web can be expressed in three different ways: 1. inferred 2. free-form tagging 3. structured data these go in order from the consumer of data doing most of the work, to the producer of data doing most of the work. **knowledge representation for the semantic web** - p. hitzler, m. krötzsch, s. rudolph: knowledge representation for the semantic web, ki 2009 semantic-web-book 3 what is a rule? • logical rules (predicate logic implications) **introduction to the semantic web** - introduction to the semantic web before going deeper into our technologies, expertise and so on, we need to have a basic idea of the main concept behind them. this concept is used everywhere in our documentation - "semantic". for example, "ontotext is a leading developer of core semantic technologies". so, what do **which semantic web? - csdl.tamu** - the semantic web writ large, the view that holds it to be the resource of personal agents forming the backdrop for a latter-day knowledge navigator. 2.1 taming the web one of the early visions of the semantic web arose as a reaction to the disorder of the web. the web was and is not ordered in a **ontology learning for the semantic web - computer science** - the semantic web ontology learning for the semantic web alexander maedche and steffen staab, university of karlsruhe the semantic web relies heavily on formal ontologies to structure data for com-prehensive and transportable machine understanding. thus, the proliferation of ontologies factors largely in the semantic web's success. **learning ontologies for the semantic web** - the semantic web relies heavily on the formal ontologies that structure underlying data for the purpose of comprehensive and transportable machine understanding. therefore, the success of the semantic web depends strongly on the proliferation of ontologies, which requires fast and **the semantic web - inria** - semantic documents and ... for the semantic web to function, computers must have access to structured collections of information and sets of inference rules that they can use to conduct automated reasoning. artificial-intelligence researchers have studied such systems since long before the web was developed. **querying the semantic web - csonybrook** - @ semantic web primer sparql basic queries sparql is based on matching graph patterns: the simplest graph pattern is the triple pattern like an rdf triple, but with the possibility of a variable instead of an rdf term in the subject, **introduction to the semantic web - world wide web ...** - ivan herman, introduction to the semantic web; dc-2007, 2007-08-31, singapore (10) > (10) some notes on the exporting the data relations form a graph –the nodes refer to the "real" data or contain some literal –how the graph is represented in machine is immaterial for now data export does not necessarily mean physical conversion of the data **what happened to the semantic web?** - the promise of the social-semantic web •the semantic web as the ideal platform for distributed social networks and social media •connect digital identities across networks (sameas) •connect distributed conversations across networks •having a profile in one network, and linking it to content elsewhere **semantic web application areas** - semantic web-enabled web services which will help to bring the semantic web to its full potential 1. introduction the world wide web (www) has drastically changed the availability of electronically accessible information. the www currently contains some 3 billion static documents, which are accessed by over 300 million users internationally. **ontoedit: collaborative ontology development for the ...** - ontoedit: collaborative ontology development for the semantic web 223 fig.1. the semantic portal at the institute aifb seal is a framework for managing community web sites and web portals based on ontologies. the ontology supports queries to multiple sources, but beyond that it **example semantic web applications - mit** - example semantic web applications introduction other lessons address what the semantic web is, what are key characteristics of a semantic web application, and where its strengths lie compared to most traditional technologies (coming soon!). this lesson presents several specific, successful examples of semantic web applications in order to **the semantic web - isi** - the semantic web w3c's tim berners-lee: "weaving the web": "i have a dream for the web... and it has two parts." • the first web enables communication between people - the web shows how computers and networks enable the information space while getting out of the way

international semantic web conference guide (v. 3.2) - international semantic web conference guide (v. 3.2) the conference guide is aimed at organizations who wish to bid to host a conference in the international semantic web conference series. the international semantic web annual conference introduction in 2002 the semantic web science association (swsamanticweb) **the semantic web in teacher education - eric** - the semantic web will become more prevalent and prominent in educational settings in the next four to five years (czerkawski, 2012). the three advantages of the semantic web listed by maddux, liu, li and sexton (2011) are: "1) an aid to **python programming | semantic web** - python programming | semantic web what is semantic web? semantic web = triple data structure (representing subject, verb and object) + uris to name elements in the triple data structure **the semantic web - web server** - the semantic web is not a separate web but an extension of the current one, in which information is given well-defined meaning, better enabling computers and people to work in cooperation. the first steps in weaving the semantic web into the structure of the existing web are already under way. **semantic web in 10 years: semantics with a purpose - stko** - the mission: interoperability semantic web in its most general aim is about interoperability being needed in almost all areas of research and businesses - it is just not called like this in most cases. **semantic web for the working ontologist - kevenlwme** - semantic web for the working ontologist modeling in rdf, rdfs and owl dean allemang james hendler amsterdam † boston † heidelberg † london new york †oxford paris san diego san francisco morgan kaufmann publishers is an imprint of elsevier **semantic insecurity: security and the semantic web** - security and privacy of the semantic web can be recti ed needs serious analysis if the entire research endeavour is to be taken seriously, and considerable work if the semantic web is to ever be deployed, particularly for use-cases involving personal data. the semantic web is based on linked data where items of interest are iden- **potential advantages of semantic web for internet commerce** - the emerging of semantic web makes us ask if it is another hype. this paper focuses on its potential application in internet commerce and intends to answer the question to some degree. the contributions are: first, we find and examine twelve potential advantages of applying semantic web for internet commerce; second, we conduct a case study of e- **role of semantic web in health informatics - cci** - role of semantic web in health informatics satya s. sahuo, gq zhang division of medical informatics case western reserve university amit sheth **metcalfe's law, web 2.0, and the semantic web** - metcalfe's law, web 2.0, and the semantic web james hendler 1 jennifer golbeck 2 1 rennselaer polytechnic institute 2 university of maryland, college park hendler@cs.rpi, jgolbeck@umd abstract: the power of the web is enhanced through the network effect produced as resources link to each other with the value determined by **the semantic web — rdf, rdf schema, and owl (part 1)** - "the semantic web is an extension of the current web in which information is given ... mitchell w. smith — the semantic web - rdf, rdf schema and owl (part 1 of 2) page 21 rdf/xml syntax rdf triplet syntax: ... mitchell w. smith — the semantic web - rdf, rdf schema and owl (part 1 of 2) page 24 rdf/xml syntax - id and base **oracle database 11g semantic technologies** - the semantic web is a project and vision of the world wide web consortium to extend the current web, so that "information is given well-defined meaning, better enabling computers and people to work in cooperation." this is important, as the mix of content on the web and in applications built using web architectures is shifting from exclusively **semantic web: revolutionizing knowledge discovery in the ...** - semantic web technology is being increasingly used to implement solutions that overcome many of the obstacles to the development and integration of web services resources. this trend includes initiatives by the world wide web (w3c) consortium's semantic web health care and life sciences interest group (hclsig) [15]. **semantic web core technologies** - semantic web core technologies muhammad alsharif, mhalsharif at gmail (a paper written under the guidance of prof. raj jain) download abstract this is survey of semantic web primary infrastructure. semantic web aims to link the data everywhere and make them understandable for machines as well as humans. **what is the semantic web? - trilug** - what is the semantic web? an evolving extension of the world wide web in which the semantics of information and services on the web is defined, making it possible for the web to understand and satisfy the requests of people and machines to use the web content. **information retrieval and the semantic web** - information retrieval and the semantic web tim finin1, james mayfield2, anupam joshi1, r. scott cost2 and clay fink2 university of maryland,1 baltimore county baltimore md 21250 usa the johns hopkins university2 applied physics laboratory **ontologies and the semantic web - school of informatics** - •web was "invented" by tim berners-lee (amongst others), a physicist working at cern • his vision of the web was much more ambitious than the reality of the existing (syntactic) web: • this vision of the web has become known as the semantic web what is the semantic web? **the semantic web - agfa-gevaert** - the semantic web is a vision about the future of the world wide web brought forward by the inventor of the web, tim berners-lee. it is not an utopic vision but more the feeling that the web has created enormous possibilities and that the right thi ng to do is to make use of these possibilities. **knowledge graph refinement: a ... - semantic web journal** - the cyc knowledge graph is one of the oldest knowledge graphs, dating back to the 1980s [57]. rooted in traditional artificial intelligence research, it is a curated knowledge graph, developed and main-tained by cycorp inc.7 opencyc is a reduced version of cyc, which is publicly available. a semantic web **semantic web and security - university of texas at dallas** - intersection of semantic web, data mining, and security figure 7 illustrates the intersection of data mining, security, and the semantic web. a document might be represented in xml or

rdf. to ensure that semantic web mining does not result in security violations via inferences, we need to apply privacy-preserving data mining for xml and rdf data. **semantic web - cs.hofstra** - semantic web lectures 7 and 8: rdfs & owl knarig arabshian knarigabshian@hofstra **semantic web - sharif** - datalog datalog is a query and rule language for deductive databases that syntactically is a subset of prolog. datalog is a function-free horn clause form logic such that disallows using functions in arguments of predicates. imposes certain restrictions on the use of negation and recursion. only allows range-restricted variables, i.e., each variable in the **software engineering on semantic web and cloud computing ...** - software engineering on semantic web and cloud computing platform radha guha, ph.d, uci radhaguha@yahoo anaheim, ca 92807 abstract: tim berners lee's vision of the semantic web or web 3.0 is to transform the world wide web into an intelligent web **semantic tv - is the semantic web a part of broadcasting's ...** - semantic web in a nutshell the semantic web is an extension of the worldwide web (www) which combines the web and meta-data. but it is actually more than the 'usual' metadata that is being considered here. the ambition is to shift from a web of static descriptions - exchanged between applications or **what is the semantic web? - computer science** - what is the semantic web? this is a book about a thing we call the semantic web. just from the name, you can guess that it is related somehow to the familiar world wide web (www), and has something to do with semantics. semantics, in turn, has to do with understanding the **cse 595 - semantic web - csonybrook** - (c) paul fodor (cs stony brook) and elsevier course description 2 "semantic web is an extension of the world wide web through standards by the world wide web consortium (w3c). the standards promote common data formats and exchange protocols on the web, most **rdf, jena, sparql and the "semantic web"** - the linked data web or the semantic web. as tim berners-lee writes [2]: "if html and the web make all online documents look like one huge book, rdf, schema, and inference languages will make all the data in the world look like one huge database." and, in fact, there exist rdf browsers like **the development process of the semantic web and web ontology** - semantic web. the semantic web brings a set of new emerging technologies and models that need to be found and executed. semantic web is a platform that integrates data sources using semantic rules, ontologies, web services and web processes[8]. hence semantic web is not an application but an infrastructure where applications can be developed. **making secure semantic web - unicse** - semantic web, a web resource's metadata makes it possible to evaluate its appropriateness for a given query, which in turn will lead to greater efficiency of web ensure that all of the layers of the resource allocation, despite the daily expansion of web space. as in [11], we can **journal of computing, volume 2, issue 6 ... - semantic scholar** - semantic description of data which can be used to preserve the ontologies and keep them ready for inference. this paper provides basic concepts of web services and the semantic web, defines the structure and the main applications of ontology, and provides many relevant terms are explained in order to provide a basic understanding of ontologies. **the information grid: a practical approach to the semantic web** - semantic web; the goal is to enable organizations to view all their assets in a smooth continuum, from the internet to the intranet, with uniform semantically rich access. within an application grid, individual modules run on different parts of the infrastructure, with sharing of application state and control enabled via web services. **semantic web development - apps.dtic** - an on-ramp for many newcomers to the semantic web technology. despite these successes, the semantic web has a long way to go - both in terms of research on the higher layers and in deployment. the report discusses factors which may have affected deployment speed, and concludes with an outline of ongoing efforts which would be appropriate. 15.
