
Unitary Reflection Groups

finite unitary reflection groups - math.ucsd - remaining root, if the reflection is of period m , is a primitive m th root of unity, and the reflection is then said to be m -fold. shephard, in the paper just quoted, has considered a particular class of unitary groups generated by reflections which possess properties closely analogous to those of the real orthogonal groups considered by coxeter. **unitary reflection groups for quantum fault tolerance** - specific relations. more generally, unitary reflection groups (also known as groups of pseudo-reflections or complex reflection groups) leave a hyperplane pointwise invariant within the complex vector space [8, 9]. the simplest example of a coxeter group is the dihedral group d_{2n} ($n > 2$), which is the symmetry group of a regular polygon with n **unitary reflection groups** - unitary reflection groups / gustav i. lehrer, donald e. taylor. p. cm. - (australian mathematical society lecture series ; 20) includes bibliographical references and indexes. **on the finite imprimitive unitary reflection groups** - on the finite imprimitive unitary reflection groups e. w. read pure mathematics department, give&y college of wales, aberystwyth, dyfed, wales communicated by b. huppert received september 22, 1975 i let $v = \mathbb{C}^n$, the complex vector space of dimension n with standard unitary inner product. **unitary representations of rational cherednik** - we begin the study of unitary representations in the lowest weight category of rational cherednik algebras of complex reflection groups. we provide the complete classification of unitary representations for the symmetric group, the dihedral group, as well as some additional partial results. **classification of finite groups generated by reflections ...** - classification of finite groups generated by reflections and rotations christian lange and marina a. mikhaïlova ... subgroups and unitary reflection groups considered as real groups. in this paper we obtain a complete ... classification of finite reflection-rotation groups 3 finite subgroups of so_4 are listed in ... **freeness of multi-reflection arrangements via primitive ...** - real reflection groups to unitary reflection groups, see theorems 1.1 and 1.2. it turns out that the constant multiplicity in the real case stems from the fact that real reflections have order two. in the general case this constant multiplicity is replaced by the order multiplicity given by the orders of the unitary reflections involved. **quantum theory, groups and representations: an introduction** - quantum theory, groups and representations: an introduction peter woit department of mathematics, columbia university woit@mathlumbia **unitary matrices - texas a&m university** - unitary matrices 4.1.1 groups of matrices invertible and unitary matrices have a fundamental structure that makes possible a great many general statements about their nature and the way they act upon vectors other vectors matrices. a group is a set with a math-
