time? "i was once told that there are seven storms of the rainy season. it is in fact important that there is such a tradition; but i eventually discovered that it was hopeless to try to find an exact list of seven storms"<sup>1</sup>. the question of time and in particular its local **why are there so few christian anthropologists ...** - anthropologists (unknown to us) or a grateful student "out of the closet" who thought that no other christian anthropologists existed. volume 58, number 4, december 2006 267 dean e. arnold. the "network of christian anthropologists" is an informal group of colleagues. **basic classical ethnographic research methods** - ethnography, primary data collection is carried out primarily through fieldwork. in fact for many anthropologists fieldwork is almost synonymous with ethnography<sup>1</sup>. my position is that fieldwork is essential to ethnography. so what is fieldwork, and why do anthropologists **chapter 1 human beings and being human: an overview of ...** - anthropologists, and the knowledge and understanding they generate while studying the many different ways of being human, can help smooth out inter-cultural communications; how they do this is also covered in chapter 12. **chapter 2: culture - 1642598126cn77** - 3. how do cultural anthropologists use the word culture? a. to refer to unchanging, traditional ways of doing things b. to designate which practices are more worthy of study than others c. to refer to the beliefs and customs of a people that distinguish them from others d. to describe a situation of high sophistication and education **anthropologists go native in the corporate village** - the company. it's not all that different from her previous work. "anthropologists help elicit the cultural patterns of an organization," she says. "what rules do people have about appropriate and inappropriate behavior? how do they learn those rules and pass them on to others?" **ontologies, anthropologists, and ethical life** - let's be clear: anthropologists certainly know people who do inhabit dramatically different worlds of practice and thought; moreover, our vocation requires us to open ourselves to the challenges they pose. but we do not enter into those worlds primarily via the didactic virtuosity of indigenous metaphysical theorists. **anthropologists and indigenous peoples: conflicts and ...** - macmillan. (ch 4. "anthropologists and other friends," 78-100). 1. what are at least two of the primary accusations that deloria levels at anthropologists in this chapter? 2. note how the issue of the defunct "real indian" appears in this piece. 3. what damage do anthropologists do, in deloria's view? 4. **research ethics in ethnography/anthropology** - anthropologists who conduct their research in a range of different countries and cultures, while upholding these values are, at the same, time promoting them globally. as multi-site, interdisciplinary and cross-national studies grow due to larger corporate commissioning the issues of ethical review become even more complex. **"anthropologists in arms" - usna** - anthropologists are being asked to assist in the development of new "regional studies" programs for the department of defense and its constituent military organizations. more recently, under the code name "project minerva," secretary of defense robert gates (himself a historian and **introduction to biological anthropology: notes 9 why ...** - you do not need to memorize the whole thing - this is not a major focus of the course - but the primates make a lot more sense if you consider how they are related - this chart may be helpful when you do the zoo project - for the purposes of anthro 201, you should know: **anthropologists and missionaries: brothers under the skin** - anthropologists and missionaries: brothers under the skin sjaak van der geest university of amsterdam this article explores the ambiguous relationship between anthropologists and missionaries, both in their work and in their writings. it describes, first, the well-known stereotypes by which anthropologists **anthropology, anthropology, history of history of** - anthropology, history of anthropology is the discipline that studies races, cultures, languages, and the evolution of the human species. it is broad in scope, incorporating the archeologist surveying inca ruins, the cultural anthropologist collecting folklore in appalachia, and the biological anthropologist mapping the gene sequences of lemurs. **debating self, identity, and culture in anthropology** - anthropologists write easily about the identity of those they study in the sense of something shared with others, but they have much more difficulty in attributing a self to the people they are writing about. the attribution of a nonself to these others is expressed in debate about intercultural variability of (concepts of) the self, **cultural anthropology & public health** - anthropologists do, however it is only one aspect of a very broad discipline. this fact will be evident as this sentence will be the last to even mention archaeology. biological anthropology studies how biological processes contribute to human experience and diversity. cultural anthropology is interested in looking at cultural diversity in human **unit anthropological research i methods and techniques - scert** - unit- 1: anthropological research methods and techniques 13 anthropology as a science we have seen that any subject is called science because of its adoption of scientific method. anthropology applies the principles of science to study human behaviour in the same way as natural, physical and biological sciences do. hence, anthropology is a science **185 the animal question in anthropology: a commentary ...** - anthropologists commonly define their discipline, anthropology, as the study of anthropos (humankind) and think it perfectly natural to pay little or no attention to the nonhuman realm of animalkind. of course, animals do figure in anthropological **contribution of anthropology to the study of climate change** - anthropologists have brought to light how various communities - including native groups in the arctic<sup>2</sup>, coastal residents in papua new guinea <sup>3</sup> and farmers in the andes <sup>4</sup> - observe changes in the weather, climate and landscapes, and respond to these changes. anthropologists do not romanticize this place-based knowledge. **forensic anthropology and the concept of race: if races ...** - forensic anthropology and the concept of race: if races don't exist, why are forensic
